

# Hosokawa Micron`s Contract Processing Suite Now Registered for Food Products

Hosokawa Micron Ltd`s announce the commissioning of their latest contract processing suite. BRC Global Standard-Food 2005 registered for the receipt, milling/size reduction and packing of dry powders for the food industry the new suite is part of a dedicated contract processing facility at the Runcorn headquarters of the company.

The new suite, devoted solely to food products is available for customers looking to outsource particle and powder processing in lots from only a few kilos to several tonnes.

Hosokawa Micron`s state of the art contract processing facility is able to handle processing of a wide variety of materials from single process to complete multi processing solutions involving milling, micronising, mixing, classification, agglomeration and drying..

The modular design of all the processing suites and the availability and interchangeability of a wide range of different pieces of equipment means that Hosokawa Micron are able to offer efficient and reliable powder and particle processing backed by many years of expertise and process engineering know how.

## Quality Assurance

The contract processing service is supported by an in house test centre for product analysis and process evaluation and full product traceability and adherence to ISO9000/2000 international standards.

Hosokawa Micron`s contract processing service operates round the clock and now food products can be processed as well as chemicals, detergents, colour pigments, metal powders, ceramics, plastics and minerals.
